8.	Constraints identified and feedback for research	
9.	Process of farmers participation and their reaction	The farmers actively participated in the trial and satisfied with the technology
		(Training, Method Demonstration)

Thematic area: Agricultural marketing

Problem definition: To assess the performance of FPOs a structured schedule was developed to study the opinion of the member about the role of FPO in

successful marketing of the produce. Different aspects were studied in relation to the FPOs using the (3-point Linkert scale of SA-Strongly agree, PA-Partially agree, NA-Not agree) on varios aspects like 1. Social aspect 2. Technical aspect 3. Marketing Aspect 4.

Organisational Aspect

Technology assessed: TO1- FPO Dealing with multiple commodities with multi tasking

TO2 – FPOs dealing with multiple commodity with single tasking

Table:

Tuoic.				
	TO1 (N	N= 50)	TO2 (N	N=32)
Aspects	Mean score	Gap (%)	Mean score	Gap (%)
Social aspect	2.11	29.6	2.07	30.9
Technical Aspect	1.96	34.6	1.78	40.9
Marketing Aspect	2.13	28.8	1.88	37.2
Organisational Aspect	1.96	34.8	1.79	40.6

Results: In TO1 the max gap was observed in Organisational aspect whereas in TO2 technical gap were maximum. In both the groups responded were satisfied about the marketing aspect of the FPOs. As TO1 is performing diversified activities emphasis should be more on strengthening of organisation whereas TO2 shoul focus more on providing technical advisory and guidance for higher profitability and in TO2 the Max Gap was observed in Technical Aspect . Further z test was calculated. The calculated z value is greater than Z table value (level of significance). Hence, the null hypothesis is rejected and there is significant difference between two FPOs regarding the perception of the respondents about performance of FPO in in various aspects.
